PROJECTS

Web Developer with a Strong Foundation and Backend Technologies. I possess a robust background in both frontend and backend technologies. Including HTML, CSS, Javascript, React, Bootstrap, and Java. Currently, I'm pursuing a B Tech in Computer Science while actively engaging in web projects and software applications. I am committed to designing user-centric, responsive web solutions that significantly improve the overall user experience.

SOFT SKILLS

🔗 **Unegrab** A simple MP3 downloader web application that allows users to fetch and download music easily.

Tech Used: HTML, CSS, JavaScript, API integration

✉ **Tempmail** A temporary email generator that lets users create disposable email addresses for sign ups and verifications.
